

GRASP THE PROGRESS

# Next Generation Project Management

Collaboration Management Software for the Industry

[coman-software.com](http://coman-software.com)

# What is COMAN

Project Management Software  
of a New Generation

## #WeAreCOMAN

Founded in 2018, as a "spin-off" of a German R&D company.

HQ in Stendal (DE); with Offices in Berlin (2021, DE) and Chicago (2022, US).

25 CO-Men & CO-Women, and steadily growing.

Awarded in Germany with TOP100 Innovator 2021, Grand Prize of SMEs, Hugo-Junkers Prize, HiCool Entrepreneurship and many more.

## #OurCustomers

and many more...

Our customers are mostly within mechanical and plant engineering, process industry, public utilities and energy supply.

## #OurPartners

## #OurNetwork

Timur Ripke  
CEO & Co-Founder

Sven Kägebein  
CEO & Co-Founder

WHY

# About the Problem

...with complex project management

## Four Core Challenges

1. Growing digitalization and complexity of projects but the tools remain the same.

2. Diversification of trades, tasks and components lead to an ever-growing number of project participants.

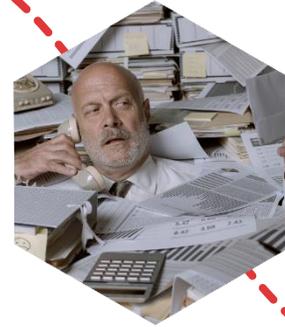

3. Constantly increasing cost pressure with hardly any savings due to manual efforts.

4. Industry 4.0 aims for data continuity in product-life-cycle and product-process resources.

Our daily lives already are digital.

...but our PM doesn't change accordingly.

That's PM in 2023 – are you serious?

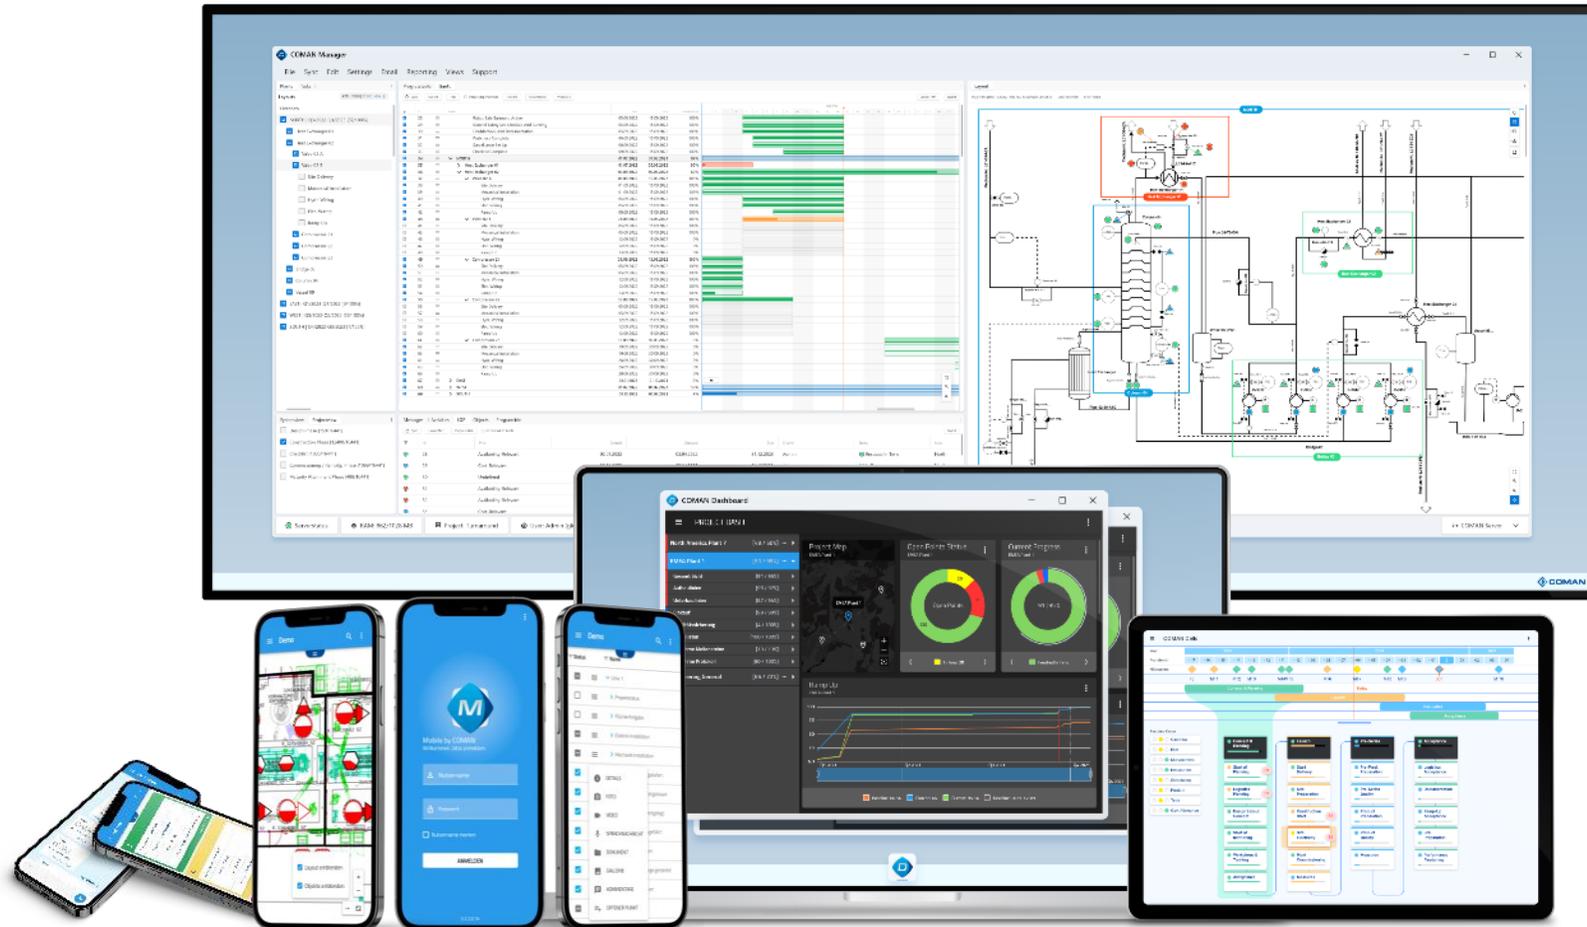

## How you still have to work

HOW

# How we gear up your Digital Worker

...through import, enrichment and synchronizations

# With one Single Platform

...our Single-Source-of-Truth as central data hub

## COMAN Manager

- Centralize project data
- Manage Roles, Rights, Views and Users
- Coordinate teams, oversee daily tasks and issues
- Easily clock in schedule changes without digging through lists

## COMAN Dashboard

- The most important information is aggregated, bundled and prepared
- Quickly comprehensible charts offer an updated evaluation of projects
- Monitor the number of open points recorded, control the progress
- The entire data across all levels summarized automatically

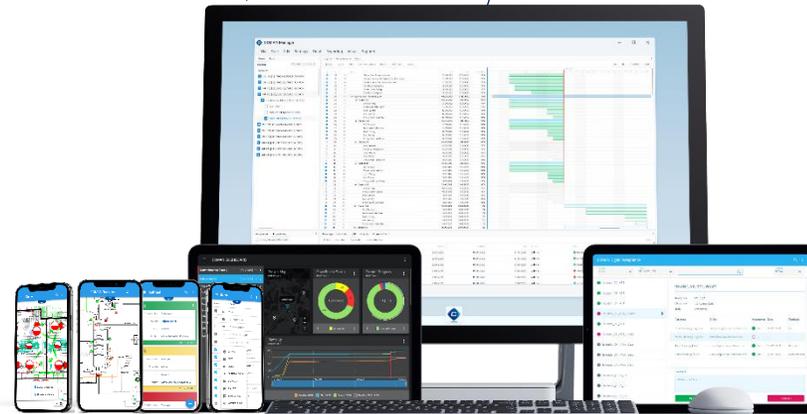

## COMAN Mobile

- Track milestones, record the progress and change the schedule
- Checklists, measurement reports and protocols - no more paper
- Record open issues, classify defects, assign it to responsible
- No network? No problem. Save data locally and upload it later

## COMAN Digital acceptance

- Verify or decline with just a few clicks, even when outside
- Approvals are pending? How far is the process? Who has released?
- Questions left? Discuss directly within the application
- Unique signature and audit-proof acceptance - without pen & paper

TRUST

# What our Customers say

...and we love them!

**"We have 70% less Open Points and therefore a massively higher product quality after ramp-up."**

Global Ramp-up Management  
Mercedes-Benz Cars

**"There was a saving by over 60% in management cost which makes over 100k EUR per project!"**

Planning and Production Technology  
Volkswagen AG

**"We had four weeks faster project delivery before planned Start-of-Production!"**

Planning Engine Manufacturing  
BMW AG

**"1 Second to grasp the overall project status – regardless it's size!"**

Public utilities  
Munich

**"Never-before-seen transparency. We are steadily on time!"**

Site management  
Achenbach B. AG

# Why not simply give it a try?

It's just a data import and not rocket science

Agree demo

Launch  
pilot project

Enjoy amazing  
project execution

Let's  
get  
in  
touch!
